Ingredients (7, plus cooking oil from base game) You will need these things, along with various harvested and-or purchased crops and foods, to craft various DCDAM items yourself. Note that milk usually comes from Brahmin, but not always, as there are other, special sources, thanks to FEV and mutation-borne plant-able crops.

Harvest-able Crops (8) These are new plants and flora that are both ingredients, which can be eaten raw, as well as fruits and vegetables that can be planted in settlements and farmed and harvested by settlers, who will also eat them. Over time, extra crops that are harvested get added to the workshop inventory, subject to the happiness rating of the settlement, etc., with it's own custom math and computations, that is reliable and predictable, instead of frustrating at times like the base game's crops. Such is still dependent on a settlement's workshop refreshing itself every day or so.
